Egnater goes Metal – introducing Armageddon

Armageddon is here and a ruler of tone has emerged. Plug into this three-channel 120-watt goliath and join the new world order.

The Armageddon is a 120 watt, 3 channel, fully MIDI capable, metal amp with the ISP Decimator® built-in. Four premium 6L6 power tubes and six hand-selected 12AX7 pre-amp tubes fuel this goliath. The 3 distinct channels take you from pristine open clean to extreme high-gain metal crunch. Egnater's signature Tight and Bright voicing switches on each channel custom tailor the low and high end response. The ISP® Decimator™ G-String offers complete noise reduction without sacrificing an ounce of tone and can be turned ON and OFF via the footswitch. The master midrange controls fine tune the mid cut or boost while reverb can be adjusted independently per channel. The Armageddon is designed to integrate seamlessly into any MIDI rig. A seven button footswitch (connects via standard XLR cable) and heavy duty cover is included.

Channel 1 produces full, rich cleans that will calm you between bursts of aggression. Channels 2 and 3 share tone controls like a two headed beast shares its body. Finesse your tonal mastery using Egnater's signature Tight / Bright voicing switches. Those venturing into the world of extreme gain know the ISP® Decimator® is a essential weapon.

ISP® has teamed up with Egnater, building their Decimator® G-String noise reduction right into Armageddon, resulting in a dead silent amplifier that screams with gain. The master midrange controls allow for fine tuning the precise amount of mid cut or boost.

The independent reverb controls on each channel allow you to dial in just a touch of reverb or soak your tone in it. The 7-button footswitch gives you control over every amp feature. MIDI IN and THRU connections, as well as external setup switches mean no matter what MIDI setup you're using, Armageddon can integrate into your rig.

Egnater Tweaker 40 information

Egnater beef up popular Tweaker line with high powered Tweaker 40

Tweaker-40 is an expansion of the award winning Tweaker-Series and is packed with the features "Tweakers" have been asking for. The Tweaker-40 offers the classic tonal characteristics of the original Tweaker with more than double the power, 6L6 tubes and two independent channels each with an expanded set of Tweaker switches. Available as a head or 1x12" combo, with Tweaker 2x12 extension cab also available

The 11 on-board "Tweaker" switches provide a wide range of vintage tones from ultra pristine cleans to over saturated leads. Use the USA / AC / BRIT switch to dial in your choice of American, British or VX EQ. The Hot / Clean selector takes you on a journey from low to high gain while the Vintage/Modern switch transforms the amp's feel from classic rock to modern edge. The Mid Cut switch sculpts the critical midrange while Egnater's signature tight and bright switches let you shape the low and high-end.

Tweaker 40 Head Specs

- 40-Watt All-Tube Amp
- **Premium Tubes:** 2 x 6L6 & 3 x 12AX7

Egnater Tweaker 88 information

Egnater beef up popular Tweaker line with high powered Tweaker 88 head

Tweaker-88 is an expansion of the award winning Tweaker-Series and is packed with the features "Tweakers" have been asking for.

The Tweaker 88 is sure to satisfy the most demanding tone junky. This 88-watt powerhouse delivers a hot dose of addictive tone via a bigger box, bigger tubes and a bigger sound. Bruce Egnater took everything great about the Tweaker and made it.....bigger!

The 13 Tweaker switches offer a seemingly endless palette of tonal variations. Add to this, an innovative dual-channel boost function and you get a quasi four channel amp that will satisfy your jones for tone. The boost can either be clean or a volume + gain boost for your soaring solos. Hand selected KT88 tubes allow you to revel in the lush classic cleans and shred through the intense overdrive.

Tweaker 88 specs

- 88-Watt All-Tube Amp
- **Premium Tubes:** 2 x KT-88 & 4 x 12AX7

Egnater goes Metal – introducing Vengeance

Vengeance shall be yours! This versatile high-gain, all-tube amp with 120 relentless watts gives you the power to take revenge on lacklustre tone.

Channel 1 takes you from lush, organic cleans to heavy crunchy rhythm while Channel 2 goes from serious classis rock overdrive to extreme modern metal. Egnater's signature Tight & Bright voicing switches and a mid cut / boost switch on each channel further customizes your tone. Independent reverb on each channel has an innovative "spillover" design, allowing natural decay when switching channels.

The foot-switchable secondary master volume pushes solos to harrowing heights. A balanced speaker-emulated output goes directly to the board live or in the studio. A 6-button footswitch connects via a standard XLR cable, which is easily replaceable. Standard 1/4" jacks for external control of the switching functions provide increased flexibility.

Egnater Vengeance Head Specs

- 120-Watt All Tube Head
- **Premium Tubes:**
 - 4 x 6L6 & 6 x 12AX7
- Selectable Full/Half Power Switch (120/60-Watts)
- **Two Independent Channels each With:**

- Volume, Gain and 3-band EQ
- Tight and Bright Voicing Switches
- Mid Cut/Boost Voicing Switch
- High/Low Gain Switch
- Independent Reverb Controls with "Spillover"
- **Master Controls:**
 - Presence & Density
 - Main and Secondary Master Volumes
- Six Button Footswitch for Channel Select, Channel 1 Mids, Channel 2 Mids, Effects Loop, Reverb and 2nd Master Volume
 - Assign the Effects Loop and 2nd Master to Channel 1, Channel 2 or Both
 - Connects to Amp Via a Standard XLR Cable
- Additional ¼" Jacks for External Control of Switching Functions
- Simple Bias Adjust with External Test Points
- Balanced XLR Cabinet Voiced Line / Recording Output
- Buffered Effects Loop with Send and Return Levels

Egnater Vengeance Cabinet Specs

- Celestion™ Seventy/80 Loaded
- 320 Watts RMS
- Rugged Detachable Casters
- Void-free Birch Plywood construction
